

Bühler South Asia

The Indian operations of Bühler commenced in 1992, with its base at Attibele, near Bangalore (Karnataka). Bühler South Asia is a leading system provider for complete solutions in various Businesses like Rice Milling, Flour / Atta Milling, Specialty Milling, Brewing, Feed Milling, Grain Logistics, Drying, Chocolate, Pasta, Grinding & Dispersion, Die Casting and Vacuum Coating. Bühler provides complete solutions to the customers by supplying plant & equipment along with engineering, automation, installation and commissioning services. Our focus is to motivate local teams to work on local innovations and deliver Swiss quality.

Highlights :

- Around 550+ employees
- 20 Sales & service office spread across the regions
- 15 Channel partners
- A full - fledged Application Centre
- A well equipped Analytical Laboratory

Bühler – A trusted partner for Spices processors around the World

Bühler offers a wide range of processing solution for various grains and seeds along with expert consultancy in designing, installing and commissioning of processing plants.

Spices are commonly exposed to dust, dirt, insects, and animal waste during harvesting. An effective cleaning system is generally the first priority for the processor to provide clean, safe products to their various customers. Moreover, a properly graded product also adds to their commercial value in the market.

Bühler cleaning systems are designed for high efficient cleaning with minimum loses. Bühler complete cleaning system ensures that products meet the stringent export standards.

Among benefits on superior product quality and hygienic processing, Bühler engineered system also ensures gentle handling of products through proper conveying and well aspirated plants for a dust free environment.

As a pre-condition, hygienic processing of spices requires the process system to be free from human touch or other cross-contaminations. Bühler fully automated plants and closed process system for spices are particularly suited for this purpose. Processors who are looking to achieve high standards in spices processing specially for export, prefer Bühler plants as they can easily achieve international quality and food safety certifications like ISO , HACCP , BRC and so on. In addition, automated plants also offer savings in power consumption and labor costs, offering low cost of ownership to Bühler customers.

Offering complete solutions for a range of spices with throughput starting from 500kg upto 4 tons per hour, Bühler has been a trusted partner for spice processors around the globe.

Bühler Spice Processing Plants

Bühler provides highly efficient equipment for Pre-cleaning, cleaning, grading and optical sorting which helps to remove a wide range of impurities and ensures highest purity of product. The product can also be graded as per size, weight or shape. Our range of specialized equipment include **Cleaner classifier, Gravity Separators, Destoners, Spiral separators, Thickness and Length graders & Colour Sorters (Sortex A & B series)**. In addition to main equipment Bühler also provides a complete range of supporting equipment such as conveyors, filters, cyclones, magnets, etc.

Bühler Multi-product cleaning plants are designed to add value to your business through

- Extra yield due to minimum wastage of good product with bad product
- Reduced power consumption
- Semi or Fully automatic plants with minimum labour requirement
- Dust free plant – by an efficient aspiration system
- Closed machine – food safety ensured
- Maintenance free equipment
- World-Class Customer service

Spice Grinding

Bühler provides **Spices grinding plants** which can grind Red Chilli and variety of Seed spices. Bühler's renowned hammer mills and roller mills together with a superior grinding process ensures a very small rise in product temperature during grinding which helps in maximum retention of natural flavor and colour of product. Moreover the proper aspiration system built into the plant ensures comfortable working conditions and hygienic mill environment.

Bühler's experience and expertise in providing complete mechanical engineering solutions, automation & control systems and project management make Bühler a unique supplier for the grain and seed processing industry.

About Bühler:

Every day, billions of people come into contact with Bühler technologies to cover their basic needs for foods, mobility, or communication. With our industrial-scale process technologies and solutions, we contribute significantly to feeding the world's population, setting the focus on food security and food safety. Bühler flour mills process around 65% of the wheat harvested worldwide into flour. Its contribution to processing rice and producing pasta, chocolate, or breakfast cereals is similarly important. Moreover, Bühler is a leading solution provider of die casting, wet grinding, and surface coating technologies, with an emphasis on automotive, optics, electronics, printing & packaging inks, and glass applications. The solutions provided for these industries are distinguished by high energy efficiency and sustainable mobility. As a leading technology group, Bühler invests up to 5% of its sales revenue in research and development. Bühler is proud of its Swiss roots, with 10,600 employees in some 140 countries generating sales of CHF 2.3 billion. The family-owned company Bühler is particularly committed to sustainability.
