

Plant Lipids, a family owned company is head quartered in Cochin in the heart of the spice growing region of south India and today commands a position as one of the largest producers of spice oils and oleoresins in the world. With production in four locations and seven manufacturing plants, more than 200 tons of raw materials is processed in the plants every day. Plant Lipids has one of the largest spice grinding facilities in India manufacturing sterilized spice powders for the international as well as domestic market. Aromatic Ingredients, a group company was set up for the manufacture of extracts, concretes and oils from Mediterranean herbs, gums and other exotic fragrance materials is a major supplier to the fragrance industry. Today the company operates in five verticals:

- Spice extracts and essential oils
- Sterilized spices
- Natural food colours
- Fragrance ingredients
- Nutraceuticals.

All the products are manufactured meeting stringent quality guidelines and are certified by globally recognized standards. We possess certifications such as Food Quality (ISO 9001), Food Safety & HACCP (ISO 22000), Laboratory Accreditation (NABL/ISO 17025), Kosher (Star-K), Halal (MUI), C-TPAT, BRC “A” grade and the Spice House Certificate. Plant Lipids is also Registered with “Sedex” for compliance with Social Standards

Sustainability is one of the key initiatives of the company and an area Plant Lipids has invested heavily into. A foundation called Plant Lipids Social Initiatives (PLSI) was set up for the same and has been working with the farming community in sustainable business models, community social development, medical and educational assistance for the needy and the children. Over the last decade a lot of investment has been made into renewable energy. Plant Lipids has been successfully producing energy in Tamil Nadu and Kerala with the installation of wind mill farms and also in Telengana with solar power projects. The company has also been the recipient of the best effluent treatment plant in the state of Kerala for the last eight years, which has been awarded by the Kerala State Pollution Control Board.

Plant Lipids has earned this lead position today by innovation and for the same has invested in a state-of-the-art modern scientific R&D facility with a team of highly trained and experienced personnel with some of the best equipment and technologies. The quality control team works around the clock in our plants to ensure that the products are of the finest quality and each of the plants have their own quality control labs. Our technical excellence has helped us enter into collaborations to manufacture specialty products under confidentiality agreements. A full fledged application lab is functional in our Head Quarters today where our food development team consisting of food

technologists and chefs help clients develop innovative food applications using our value added products.

Today we have our direct operations in six countries and has businesses in over eighty five countries of the world making it a truly global company.

The essence of nature, captured by Plant Lipids.
