

Star Agriwarehousing and Collateral Management Ltd (StarAgri) has been established with a motive to provide complete agri-business solutions under one roof, to safe guard the interest of the farmers and bulk buyers, to provide modern scientific platform for post-harvest management needs and enabling them in implementing better end to end solution. We offer a bouquet of services including procurement and origination, commodity finance, warehousing services and commodity testing & certification services.

We are also one of the first companies who took the initiative to start warehousing finance product with private banks in 2006. We have already done the business of more than INR 75,000 million on this account and repaid without delay and default. We have our offices in Mumbai, Delhi, Rajasthan, Haryana, M.P, Gujarat, Punjab, U.P, Bihar, Andhra Pradesh and Maharashtra and will be expanding in the states of southern India.

Over a short span of time, StarAgri has built deep business relationship with more than 300,000 farmers, agri-enterprises, agri-processors, oil millers, flour millers, financial institutes & banks, exporters and NCDEX. We are already in the approved panel of 34 domestic and international banks and financial institutions for providing collateral management services. Besides, we are also the approved warehouse service provider of NCDEX, State Trading Corporation of India Ltd for providing warehousing and quality testing and certification services across India.

The foundation of our strategy is to enable a competitive advantage in the agri-business industry and realise our vision of empowering rural communities. StarAgri's expansion strategy is based on expanding the warehouse network; as also the allied activities of post-harvest management. We leverage innovation and information technology in our core strategy to retain our position as the one-stop-shop for sourcing agri-commodities from India. Service innovation and new service management is an important element of StarAgri's marketing operations. Some of our key strategic initiatives are listed below:

A) Warehouse Management

- Scientific and reliable storage facilities
- Coupled with cutting edge practices in collateral management – Integrated solution approach

B) Supply Chain Management

- Immediate access to cost effective supply chain solutions
- Strong on-ground network and enduring partnerships

C) Risk Management

- Robust audit framework to minimize errors and enhance the overall efficiency in loan management
- Well-defined reporting systems and processes

With strong linkages within and beyond the value chain, StarAgri creates synergies and delivers immense benefits across the agriculture value chain. We connect farmers with customers involved in every sector of agribusiness, from agriculture and processing to testing and distribution. This, direct connect between farmers and consumers for a fully integrated agriculture system is one of our unique value propositions.

StarAgri's integrated solutions are aimed at creating value for banks and financial institutions, agri-processors, commodity exchanges, and the large network of farmers spread across rural India. The core of StarAgri's operating philosophy is to build and sustain partnerships between farming communities and customers for a more efficient market. This translates into better realisation for farmers, and lower cost for buyers.

To sum it all , our core is to establish further synergies within the agri eco system so that every participant benefits by associating with us.
